Dear Mr. Raser,

I have a vague recollection of a Moon River hat but I do not see it. I also do not remember getting it. I could have and it could have walked away with someone who was here, as files have. But it is not necessary to send another. My wife never uses them and I have several I never use. We are both of limited mobility and do not go around much. But thanks for the offer.

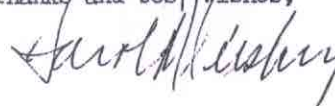

From what you say the books are in the course you are taking, it is not really on the assassination, although I presume the one who teaches it thinks it is.

My opinion is that it is not honest to use Posner's book without using Case Open.

You are correct out the theories.

With all the books on them I wonder what usefulness there is in a course on them.

Thanks and best wishes,

Harold Weisberg
